

Last 60 Minutes — Action Card

Keep this by the door for the day an order comes — Flash Wildfire Services

For the moment an evacuation order comes. Do only what's safe, and only if time allows — your departure always comes first. Leave immediately if conditions worsen.

The one rule

Never delay leaving for any of the steps below. People first, then pets, then property. If in doubt, go.

People & Pets — do first

- Everyone accounted for; go-bags and pets in the vehicle.
- Vehicle parked facing out, fuelled, windows up.
- Phones charged; alert source on; chosen route confirmed.

The House — only if time allows

- Close all windows, doors, and vents.
- Bring doormats, patio furniture, and combustibles away from the walls.
- Move firewood and propane away from the structure.
- Leave exterior lights on for visibility in smoke.
- Shut off natural gas only if instructed by authorities.

Staged sprinkler system — if you have one

- Deploy only as part of your plan and only while safe to do so.
- Confirm water source and pump are running before you leave.
- Do not return into danger to adjust it.
